Subtopic F9: Mineral Resources

One public and agency comment was received on the subtopic of F9: Mineral Resources. The primary theme associated with the F9: Mineral Resources subtopic was the lack of a section in the PEIS describing and evaluating the impacts of alternatives on all mineral resources in the project area.

CCS No.	Environmental Sensitivity Common Concern Statements (CCSs)
Subtopic F9: Mineral Resources	
F9-a	Impacts on Mineral Resources The PEIS should include a section that describes and evaluates alternative impacts on all mineral resources in the project area, including sand and gravel. If there are no impacts, this should be stated; if there are impacts, then explain what will be done to the mineral resources.
